DETAILED ACTION

Election/Restriction

1. Claims 33 and 53-82 are generic to a plurality of disclosed patentably distinct species of “synthetic polymer complement(s)”. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.
2. In order to avoid potential difficulties with the interpretation of nomenclature and in the interest of compact prosecution, applicant is requested to specifically elect a species as set forth below. Support for the species should be indicated in the instant Specification.
3. Please elect a single, specific species for *each* of A & B below as follows:
 - A. Species of “synthetic polymer complement”

Applicant should elect, for purposes of search, a ***single, specific*** “synthetic polymer complement”. Note that the target binding site(s) (specific type and number thereof) and polymeric network (defining all monomers, crosslinking group(s), head group(s) and tail region, if present) should be defined. The election should result in a “synthetic polymer complement” that is completely defined, down to the level of atoms and bonds and each portion thereof should be clearly delineated.
 - B. Species of target

Applicant should elect, for purposes of search, a ***single, specific*** target from those set forth in claim 57.

Note that a listing of all claims readable on the elected species is also required (see paragraph 6).

4. These species are distinct, each from the other, because the structures and modes of action of each of the “synthetic polymer complement(s)” encompassed are different. They would also differ in their reactivity and the starting materials from which they are made. Therefore, the species have different issues regarding patentability and represent patentably distinct subject matter. The different species would require different searches and there is no expectation that the searches would be coextensive. Therefore, this does create an undue search burden.

5. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

6. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and *a listing of all claims readable thereon*, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

7. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

8. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

9. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

10. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

11. Applicant is also reminded that a 1 - month (not less than 30 days) shortened statutory period will be set for response when a written requirement is made without an

action on the merits. This period may be extended under the provisions of 37 CFR 1.136(a). Such action will not be an "action on the merits" for purposes of the second action final program, see MPEP 809.02(a).
